## DETAILED ACTION

Claims 1-38 are pending and require restriction.

### ***Advisory Notice***

Applicant is advised that:

Claims 6-21, 26-30, and 36-38 are improper multiple dependent claims. A claim may not depend from another multiply dependent claim. See *MPEP 608.01(n)*.

Appropriate correction is required.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to a compound which interacts with the  $\beta$ -amyloid peptide.

Group II, claim(s) 22-30, drawn to a method of selecting or designing a compound which inhibits the binding of metal ions to the N-terminus of the  $\beta$ -amyloid peptide.

Group III, claim(s) 31-38, drawn to a method of inhibiting the binding of one or more metal ions to the  $\beta$ -amyloid peptide.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claim 1 is anticipated by Shao, *et al.*<sup>1</sup>. The technical feature of Group I is 'a compound which interacts with  $\beta$ -amyloid protein', which is shown by Shao to lack novelty and does not make a contribution over the prior art and therefore the claims lack novelty and are not unified by a special technical feature.

---

<sup>1</sup> July 26, 2002 PTO-1449, reference A5.

Shao teaches that, "As for the nicotine-inhibition to  $\beta$ -amyloidosis, the NMR work established that nicotine binds to the His13 and His14 side-chains of the Tyr10-Val24  $\alpha$ -helix, and this prevented an  $\alpha$ -helix  $\rightarrow$   $\beta$ -sheet conversion and  $\beta$ -amyloid precipitation." [citation removed by Examiner] (page 767).

If the Examiner's position, absent specific, substantial, and credible evidence to the contrary, that binding of nicotine to  $\beta$ -amyloid protein at His13 and His14 inherently 'blocks' the N-terminus in such a way that binding of metal ions at said His residues is inhibited.

#### ***Rejoinder Practice***

The Examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

**NO CLAIMS ARE ALLOWED.**
